

## Salon Owners

Last Updated Monday, 19 May 2008

As a company that's been involved in the hairdressing business since 1973, with the number of salons owned by the group growing to 11 by the late 80's. Dimension's has a second to none track record in knowing first hand, the training needs of salon, staff and apprentices.

As Yorkshire's largest independent hairdressing training provider, we are currently working with over 150 salons that put their trust in us to help their apprentices to successfully achieve a formal NVQ Qualification.

One thing we realise more than anything is that not all salons are the same or need the same when it comes to training. That's why the training programmes Dimensions offer can be as flexible as the individual salon wants. Many salons want to deliver the practical training themselves in the commercial salon leaving Dimensions to take care of the theory and essential knowledge. Others look to a training provider that does both the practical and theory training &ndash; we are the only provider in Yorkshire that offer each and every salon the bespoke training package they require for their Apprentices.

Please give our Employer Engagement Team the opportunity to share with you how we can work together to develop your apprentices into valuable stylists for yours and their future.
